Chatbots

BECauses RObots CAN DO WHAT YOU CAN'T
Chatbots are technologically advanced conversational engines that work on the same texting apps already used by friends and families, patients, healthcare professionals and businesses around the world. Built on NLP (Natural-Language Processing), they are designed to integrate seamlessly to all areas of your business or healthcare practice, and capable of human-like discussions thanks to a unique Artificial Intelligence (AI).
WHY A CHATBOT?
Cut your operational costs while still maintaining the same high standard of service

24/7 Availability
Delivering round-the-clock customer service and support without increasing your operational costs.

Advanced Functionality
With Natural Language Processing (NLP) and machine learning capabilities, our bot is involved in more than half of all chats, handling 3 in 5 from start to finish without any human involvement.

Personalized Experiences
Chatbots reference your customer database to provide intelligent, customized responses and are proven to be able to handle up to 80% of total chat requests with a 100% satisfaction rate.
We Check Our Phones More Than 150 Times A Day.

GUESS WHERE WE SPEND MOST OF THAT TIME?
Patients, Customers, and Healthcare Professionals already trust these channels...

HEALTHCARE CHATBOTS

We all use these apps to keep in touch with colleagues, friends, and family.

Chatbots are designed to work on the same messaging apps, web pages, social media pages already used by employees, doctors, patients, and customers.
THE CHATBOTS CAN:

**Answer**
90%+ of your Frequently Asked Questions

**Connect**
In real-time with patients and customers on their mobile phones.

**Share**
Informative content of your services + products.

**Increase**
The sale of products and services in real-time.

**Generate**
Instant leads and feedback.

**Drive**
Up patient engagement and satisfaction.
BETTER MEDICINE. SUPERIOR BUSINESS.

- **Provide** your staff with quick and efficient access to medical and administrative information
- **Simplify** your clinical operations
- **Automate** all repetitive activities and tasks
- **Offer** engaging and personalized services

Chatbots delivers a truly competitive advantage

Bots automate and streamline your daily operations to save you time and money integrating seamlessly to your existing patient management and medical platforms.
CHABOT DESIGNED FOR THE HEALTHCARE SECTOR

- Customer service to unlimited number of patients in real-time, all at once.
- 100% reliable and always accurate
- Personalized and tailored interactions

- Management of appointments and cancellations
Our Products

State of the art AI technology with Medical expertise. We understand what you and your patients are looking for.

- Proprietary platform
- Dedicated Medical team
- 20+ Medical Specialties
- 100% customizable
- 24/7 Support / Assistance
- Secure messaging
- AI Deployment Mastery
- 55+ AI scientists
- Healthcare-focused
- Constant Optimization

Competitor “X”

One size fits all technology solutions that are offered without discrimination for the industry. A chatbot for retail is as good as a chatbot for healthcare.

- More Expensive
- No Medical Knowledge
- Charge per conversations
- Limited Customization
- Third-party platforms
- Charge for Support
- No French Language
- No MDs on their team
- Not dedicated to Health
- Limited Analytics

We are MDs and AI Scientists
How Do I Get Started with Artificial Intelligence?

We at Agent Health are Artificial Intelligence experts and Healthcare professionals dedicated to offer you the best AI solutions tailored to your business.

Don’t miss out on a technology that will change the way you manage patients, service customers and deliver health services.
